RE: Retroactive Calculations for Retirees

Due to ratification of NYSCOPBA's contract, all retirees who retired **AFTER** April 1, 2016, will eventually receive retroactive payments. Retroactive calculations will be done automatically; therefore, it is not necessary for you to contact anyone in order to begin the process.

Payroll calculations will be performed by the Office of the State Comptroller's Payroll Department. Once that calculation is complete, it will be reported to the NYS Retirement System who, in turn, will determine whether the payroll calculations affect your Final Average Salary and any vacation accruals you may have turned in prior to retiring.

Sick leave credit calculations will be performed at the facility level once the Civil Service Employee Benefits Division identifies those retirees who are entitled to the recalculation of their sick leave credit.

Please understand that these calculations will not begin until the pay bill is approved and passed by the NYS Legislature. Once approved, **recalculations will be performed for active employees first, then retirees.**
